

Zeewind Bestaande Parken subfund

Essential investor information

This document provides you with essential investor information about this fund. This is not marketing material. The information provided is prescribed by law and is intended to give you more insight into the nature and risks of investments in this fund. We recommend that you read this information so that you can make informed decisions whether or not to invest in this fund.

Objectives and investment policy

The objective of Zeewind Bestaande Parken (existing off-shore wind farms) is to involve the general public in the financing of offshore wind farms on the European continental shelf in order to create a public support for the development of renewable energy and to allow people to participate in the developments of the offshore wind sector.

Zeewind Bestaande Parken will exclusively invest in the operation of offshore wind farms on the European continental shelf which meet the return objective. In practice, this means that the construction has been realised and the wind farm has been completed. Zeewind Bestaande Parken has a 19.91% share in the Belwind N.V. offshore wind farm. The investment relates to a participation in the venture capital (equity) and subordinated loans (quasi equity).

Belwind N.V. has been operational since December 2010 and the exploitation will terminate after the operational period of 20 years. The exploitation is based on the residual value being equal to the demolition costs. The Belwind concession was extended in 2015 by 6 years, until 2038. In 2014 the wind farm was extended by a 6MW test turbine.

In addition, in 2014, Zeewind Bestaande Parken fund furnished a subordinated loan (quasi equity) to the adjacent Northwind N.V. wind farm.

The aim of Zeewind Bestaande Parken is to pay dividend at least every year to the participants less 15% dividend tax. Meewind umbrella fund for renewable energy projects ('Meewind') has the status of fiscal investment institution ('FBI'), as meant in Section 28 of the Dutch Corporation Tax Act 1969 (Wet op de vennootschapsbelasting 1969). As a consequence, the result of Meewind (and its subfunds, such as Zeewind Bestaande Parken) is subject to a corporation tax rate of 0%, provided certain conditions are met such as distribution of the available profit.

Zeewind Bestaande Parken is not linked to a benchmark. Zeewind Bestaande Parken is prepared at the end of each quarter to buy participations at the net asset at that moment.

Risk and revenue profile

Historic figures, as used for the calculation of the synthetic indicator, are not reliable figures for representing the future risk profile. It is not guaranteed that the risk and return category remains unchanged. The category can change. The lowest category does not mean that the investment is without risk. The following risks are crucial for Zeewind Bestaande Parken and are not (sufficiently) displayed by the indicator:

- Throughout the world, experience with offshore wind farms has only been gained in recent years. It is a new form of renewable energy production. Fluctuations in the exploitation of the wind farms will be directly translated into a changed return.
- The long term (20 years) development of the electricity price is a variable in the exploitation of a wind farm and has a big impact on the return. In actual fact, due to the structure of the supporting subsidy, the market price plus subsidy per kWh is stabilised during the first 20 years of the operational phase.

For a complete overview of the risks of this fund, we refer you to the "Nadere toelichting rendement en risico" (Further explanation of return and risk) page of the Meewind website or to the prospectus of the Meewind umbrella fund or the Additional prospectus of the Zeewind Bestaande Parken subfund.

Costs

The costs paid by the investor are used to cover the management costs of the fund. They include marketing and distribution costs. The costs reduce the potential growth of the investment.

For more information about costs and payments, we refer to the 'Payments and costs' Chapter in the Meewind umbrella fund prospectus and the Additional prospectus of the Zeewind Bestaande Parken subfund, available on the website: www.meewind.nl.
